DETAILED ACTION

Preliminary Amendment

1. The preliminary amendment filed on 4/1/2004 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

I- As to claim 6, line 6, it is unclear by what is meant by the claimed limitation "the same side". Further, it appears that the claimed limitation "the same side" lacks proper antecedent basis in the claim.

II- As to claim 12, line 5, the phrase "the plate-like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3754

5. Claims 1-7,9,15 are rejected under 35 U.S.C. 102(b) as being anticipated by Reich et al. 5,249,713.

Reich et al. disclose an auxiliary cover (134) for a pump dispenser as seen in Figure 1, which is attached on the pump dispenser for discharging liquid in a vessel (122) with an upward and a downward direction of a nozzle head (130), the cover having a function of pressing down the nozzle head with a lever portion (158), characterized in that the cover is attached on a cap of the pump dispenser as seen in Figures 4-5, a projection (170), a base (136), a hinge portion (160), a notch (174), notch (166).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reich et al. 5,249,713 in view of Luedtke 4,278,187.

Reich et al. have taught all the features of the claimed invention except that a separable stopper is provided for preventing the rotation of the lever portion between the base portion and the lever portion. Luedtke shows a lever (48), a base portion (32), a separable stopper (70,76) is provided for preventing the rotation of the lever portion between the base portion and the lever portion (col. 3, ll. 1-17).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the base and the lever of Reich et al. by providing Luedtke's separable stopper (70,76) onto the base and the lever of Reich et al. as such, in order to provide a locking mechanism for the lever.

Allowable Subject Matter

8. Claims 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Renault 5,431,313, Nozawa 4,264,037, Reyss 5,242,090, Edman et al. 4,186,855, Vieler et al. 4,124,148, Renault 5,370,281, Meenan 5,316,185, Beres et al. 3,395,838, Debard 4,053,086, Irwin et al. 5,839,616, Brooks 3,478,935, Nozawa et al. 4,141,471, Clanet et al. 5,624,055, Beard 4,077,549, Beard 4,077,548 and Knox et al. 4,424,919 disclose other types of auxiliary cover.
